2 MOBILE TECHNOLOGY

K-12 schools are increasingly seeing the potential of mobile devices — and noting that not only are the devices themselves less expensive than most laptops, they need less infrastructure to support them.

EXAMPLE:

Using iPhones, 5th – 12th graders are gathering and tracking GPS-tagged bird sightings for WildLab, a scientific research program.

IN TWO - THREE YEARS

3 GAMING

The productive role of play allows for experimentation, the exploration of identities, and even failure.

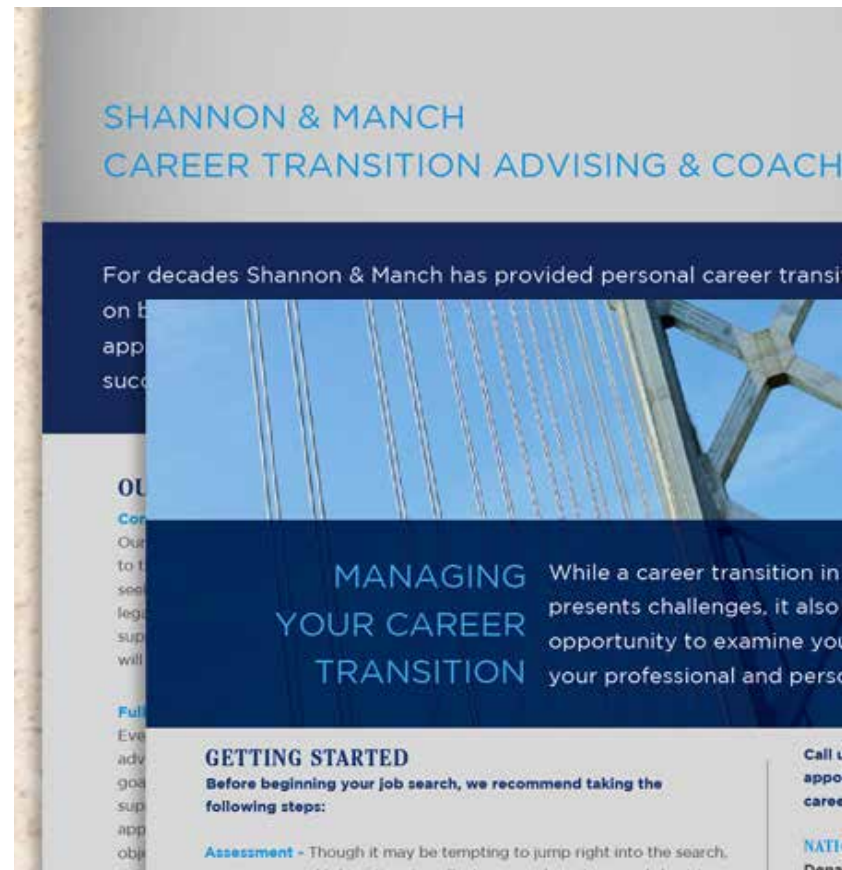

EXAMPLE:

Palm Beach Gardens High School is using a web-based game show format in their language arts program.
